

Color Splash

1. Open up Adobe Photoshop CS5
2. Go to **File – Open**
3. Find the file you want to open.
4. Make sure your layers palette is visible. If it is not, go to “**Window**”, then “**Layers**”
5. Make a **copy** of your layer.
6. Click the **eyeball** on the second layer (the layer copy) to hide it.
7. On the first layer, click on “**Image**” then “**Adjustments**” then “**Black and White**”
8. Next, click on the **eyeball** next to the “**Layer Copy**” to make it visible
9. Then, choose the **eraser tool**.
10. Change the size of the eraser so that it is larger and easier to work with
11. Decide which part of the image you would like to keep colored
12. **Erase everything** except for the part you would like to keep in color
13. **Zoom in** so that the area you want colored is very large so that you could erase neatly around it
14. **Use the history tool** if you make a mistake and erase too much of the image
15. As you’re working with the eraser tool, adjust the size of the brush as needed
